

A barrier and ventilation path between the insulation and roof.

Roll Out Rafter trays are a simple but effective way of preventing loft insulation from being pushed up to the underside of the roofing underlay and maintaining a clear ventilation path into the roof void from the eaves. The rafter trays are suitable for 10,000 mm²/m or 25,000 mm²/m continuous eaves ventilation.

Features and benefits

- Maintains a path for 10mm and 25mm eaves ventilation.
- Recycled material with reinforcement for additional strength.
- Quick and easy to install.
- Available in five widths.

Area of application

- Suitable for roofs with a pitch over 12.5°
- 400-600mm rafter centres.

Related products

- Vented Eaves Protector KP3005/KP3006-0450.
- Over Fascia Vent KP964300/KP965200.
- Underlay Support Tray KP973910.

Approvals and certifications

- Complies with BS5250.
- All products supplied by Klover Ltd are covered by a 10 year guarantee against manufacturing defect.

Technical guidance

Material	Recycled PET
Ventilation area	25,000 mm ² /m
